

Lotiv

Work happens everywhere today. Light in scale and convenient, pull up the Lotiv table for those scheduled gatherings or the more serendipitous moments. Lotiv derived from a design collaboration with Kansas State University students who studied the

evolving workspace and identified the need for more flexible surfaces to support activity in casual spaces. Purposeful details such as an inline handle for mobility and a device groove to keep screens readily accessible elevate Lotiv's utility.

Lotiv

Features

- 16" x 17" Table top
- 29" Table height
- Device groove
- Painted worksurface
- Powder coated frame

Options

- Standard or studio powder coat frame
- Standard or studio paints

INTERIOR ARCHITECTURE
& PRODUCT DESIGN
THE COLLEGE of
ARCHITECTURE, PLANNING & DESIGN // K-STATE

In partnership with the Interior Architecture and Product Design School at Kansas State University, two student designers, Katherine Arndt and Christopher Garcia, envisioned Lotiv for OFS during their senior class product design project. Arndt and Garcia researched the marketplace and the OFS portfolio and

then collaborated with the OFS product development team to commercialize their sketches and prototypes into a viable contract solution. KSU and OFS have an on-going product design program based on the shared passion for the advancement of student designers.
