Solid Surface

Nonporous, stain-resistant, and easy to clean, are a few of the reasons Solid Surface is an ideal material for healthcare, corporate and educational environments. It is extremely durable and easily renewed, because the color runs through and through. A 1/2" Acrylic Solid Surface top is applied to a 1/2" premium quality birch hardwood plywood panel.

Quartz

Quartz creates unique surfaces with the true elegance you demand of natural stone and the hard-working performance everyday life requires. Unlike other stone materials, you never have to seal, polish or recondition the surface to maintain its luster. Available in multiple colors, 3 cm thick, that will be the perfect accent for any space.

designed by

KBI is always looking for different materials and new ways to create extraordinary furniture. So when their designers saw the beauty and simplicity of Lumicor's Luminous solid surfaces, a spark was lit to merge a radiant burst of color with the architectural weight of the steel wire base they were developing.

Using a premium birch hardwood plywood layer creates additional warmth that helps to ground the design of the Brooklyn Coffee Tables and Side Tables.

Constructed by welding curved steel rods to circular frames, Brooklyn Occasional Tables are distinctive pieces that can brighten up and add modern elegance to any space.
