## STRATOS

Designed by Jehs+Laub, STRATOS is a study of statics, materials, and technology. The result is a meeting table that exudes strength while remaining light, modern, elegant.

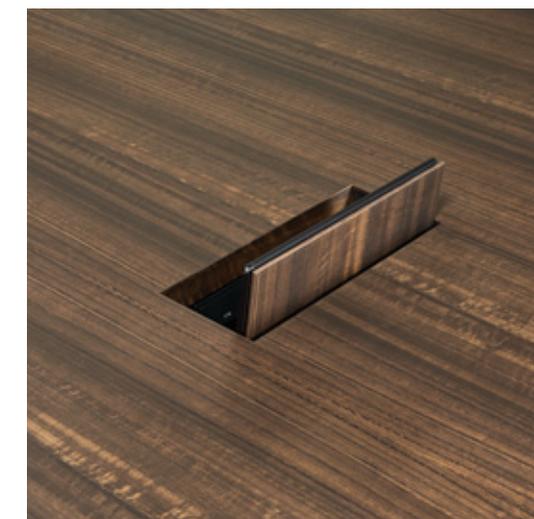

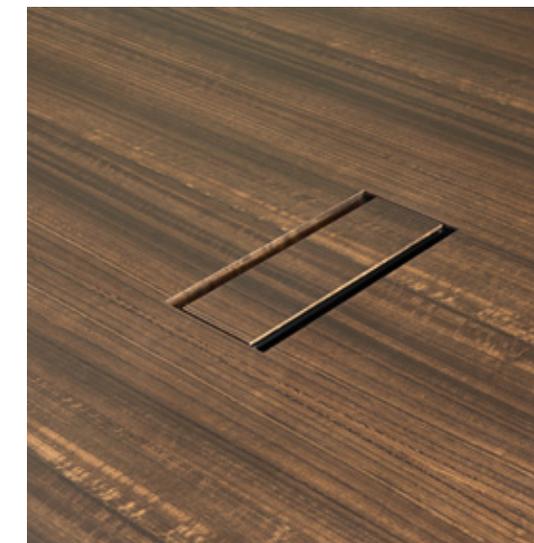

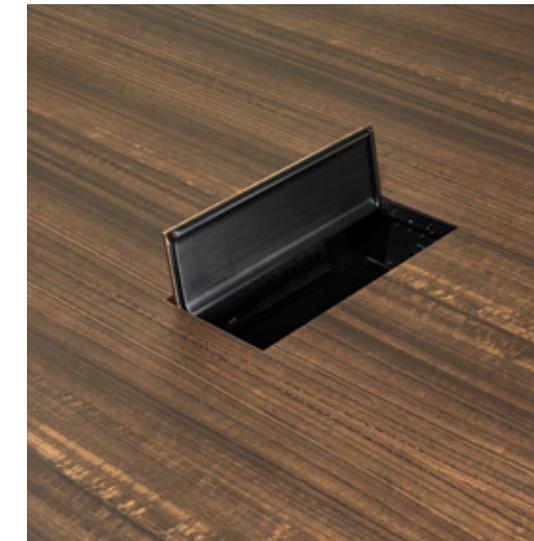

A sculptural metal base supports any surface size and shape, expanding its stable structure to adapt to every room. The beautiful form is complemented by the soft curves of the table surface, bringing people together to collaborate and achieve.

LEFT | STRATOS pairs modern design with a flexible, parametric system for tables of any size and shape.  
60d x 192w

RIGHT | Grain-matched doors are dual-flipping, granting convenient access to power and data connections.

LEFT | A beautiful FENIX NTM Nero Ingo surface is paired with the sculptural base.

RIGHT | Soft-touch power modules at the perimeter edge deliver connectivity to your fingertips.
