DESIGNS

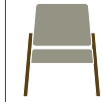

Designed by
Amanda Swartwout

The Tabella chair is a collaboration with design engine Studio|BRiNK. At its core, the Tabella represents flexibility and ease of application. The Tabella was designed to fit a variety of applications and aesthetic conditions to offer a whole-facility solution for side chairs.

The range of arm types allows accommodation of nearly all building types while saving the time, money and coordination needed to find a compatible side table if so desired.
