

UpSide™

HEIGHT ADJUSTABLE WORKSURFACES

Offices. Perfectly Tailored.™

THE FUNCTION AND FORM OF HEIGHT ADJUSTABLE WORKSURFACES HAS EVOLVED.

With versatility at its core, integration into your workspace is made easy. Encourage movement and promote efficient posture effortlessly by working at varying levels of comfort. Sit or stand, you can alter the way you work with the press of a button.

Upside worksurfaces can integrate into panel-based or freestanding applications. Ample leg room is the result of a proprietary Three H design using custom fittings which eliminate the need for base feet in panel configurations.

Two adjustable mechanisms are available: The 2 stage leg option offers a range of 26-45 inches. While the 3 stage offers a range of 23-49 inches in height, it also features an LED display indicating current height and 3 memory positions – adapting to individual needs. Built-in to the 3-stage model, is an anti-collision sensor that prevents material damage to the desk in case of collision.

Proprietary Three H Panel-integrated Leg Design

No base feet required when integrated into Three H panels.

UpSide has been designed to integrate into all Three H product lines shown here:

- / MultiStations OS Panel System
- / Create Office Platform
- / Premiere Private Office
- / Wall Tiles (shown on back cover)

UpSide™

Surface mounted screens designed for freestanding tables offer privacy and practicality. Optional is a top or under-mounted plexiglass option. And with power/data in mind, spiral wrapping bands are included to group multiple wires and prevent cable abrasion.

A selection of worksurface sizes supports multi-functional spaces while an optional knife edge on freestanding tables accentuate the thin and sophisticated profile. And, of course, the coveted Three H solid wood edge with mitred edges – that is hand applied and stained – can also be selected.
