NUCRAFT

2019

made.

Nucraft takes pride in its handcrafted-ness — a manufacturing plant that feels like a wood shop, where specials are commonplace, meticulously sculpting beautiful furniture down to every detail.

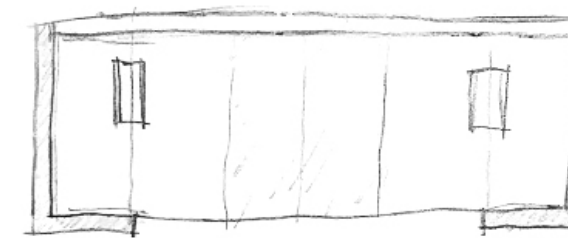

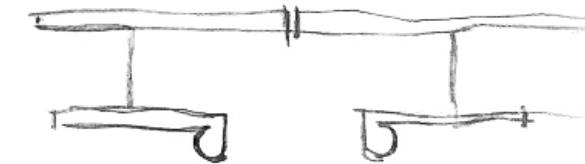

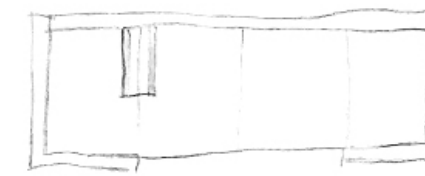

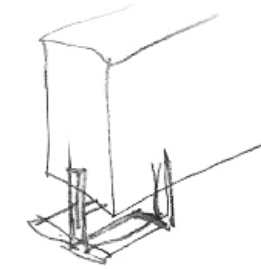

Nucraft pieces are not produced, they're made.

JOSEPH JEUP
Designer & President

Driven by instinctual talent and innate passion, Joseph Jeup embodies exceptional craftsmanship. He believes every detail is a design opportunity and that uncompromising standards yield incomparable results. This philosophy has helped establish Jeup as a world-class designer with a devout following who regard his work as functional art. As an engineer and a designer, he uses both disciplines to tackle design from a broad perspective, which is what defines him as a craftsman and artist.

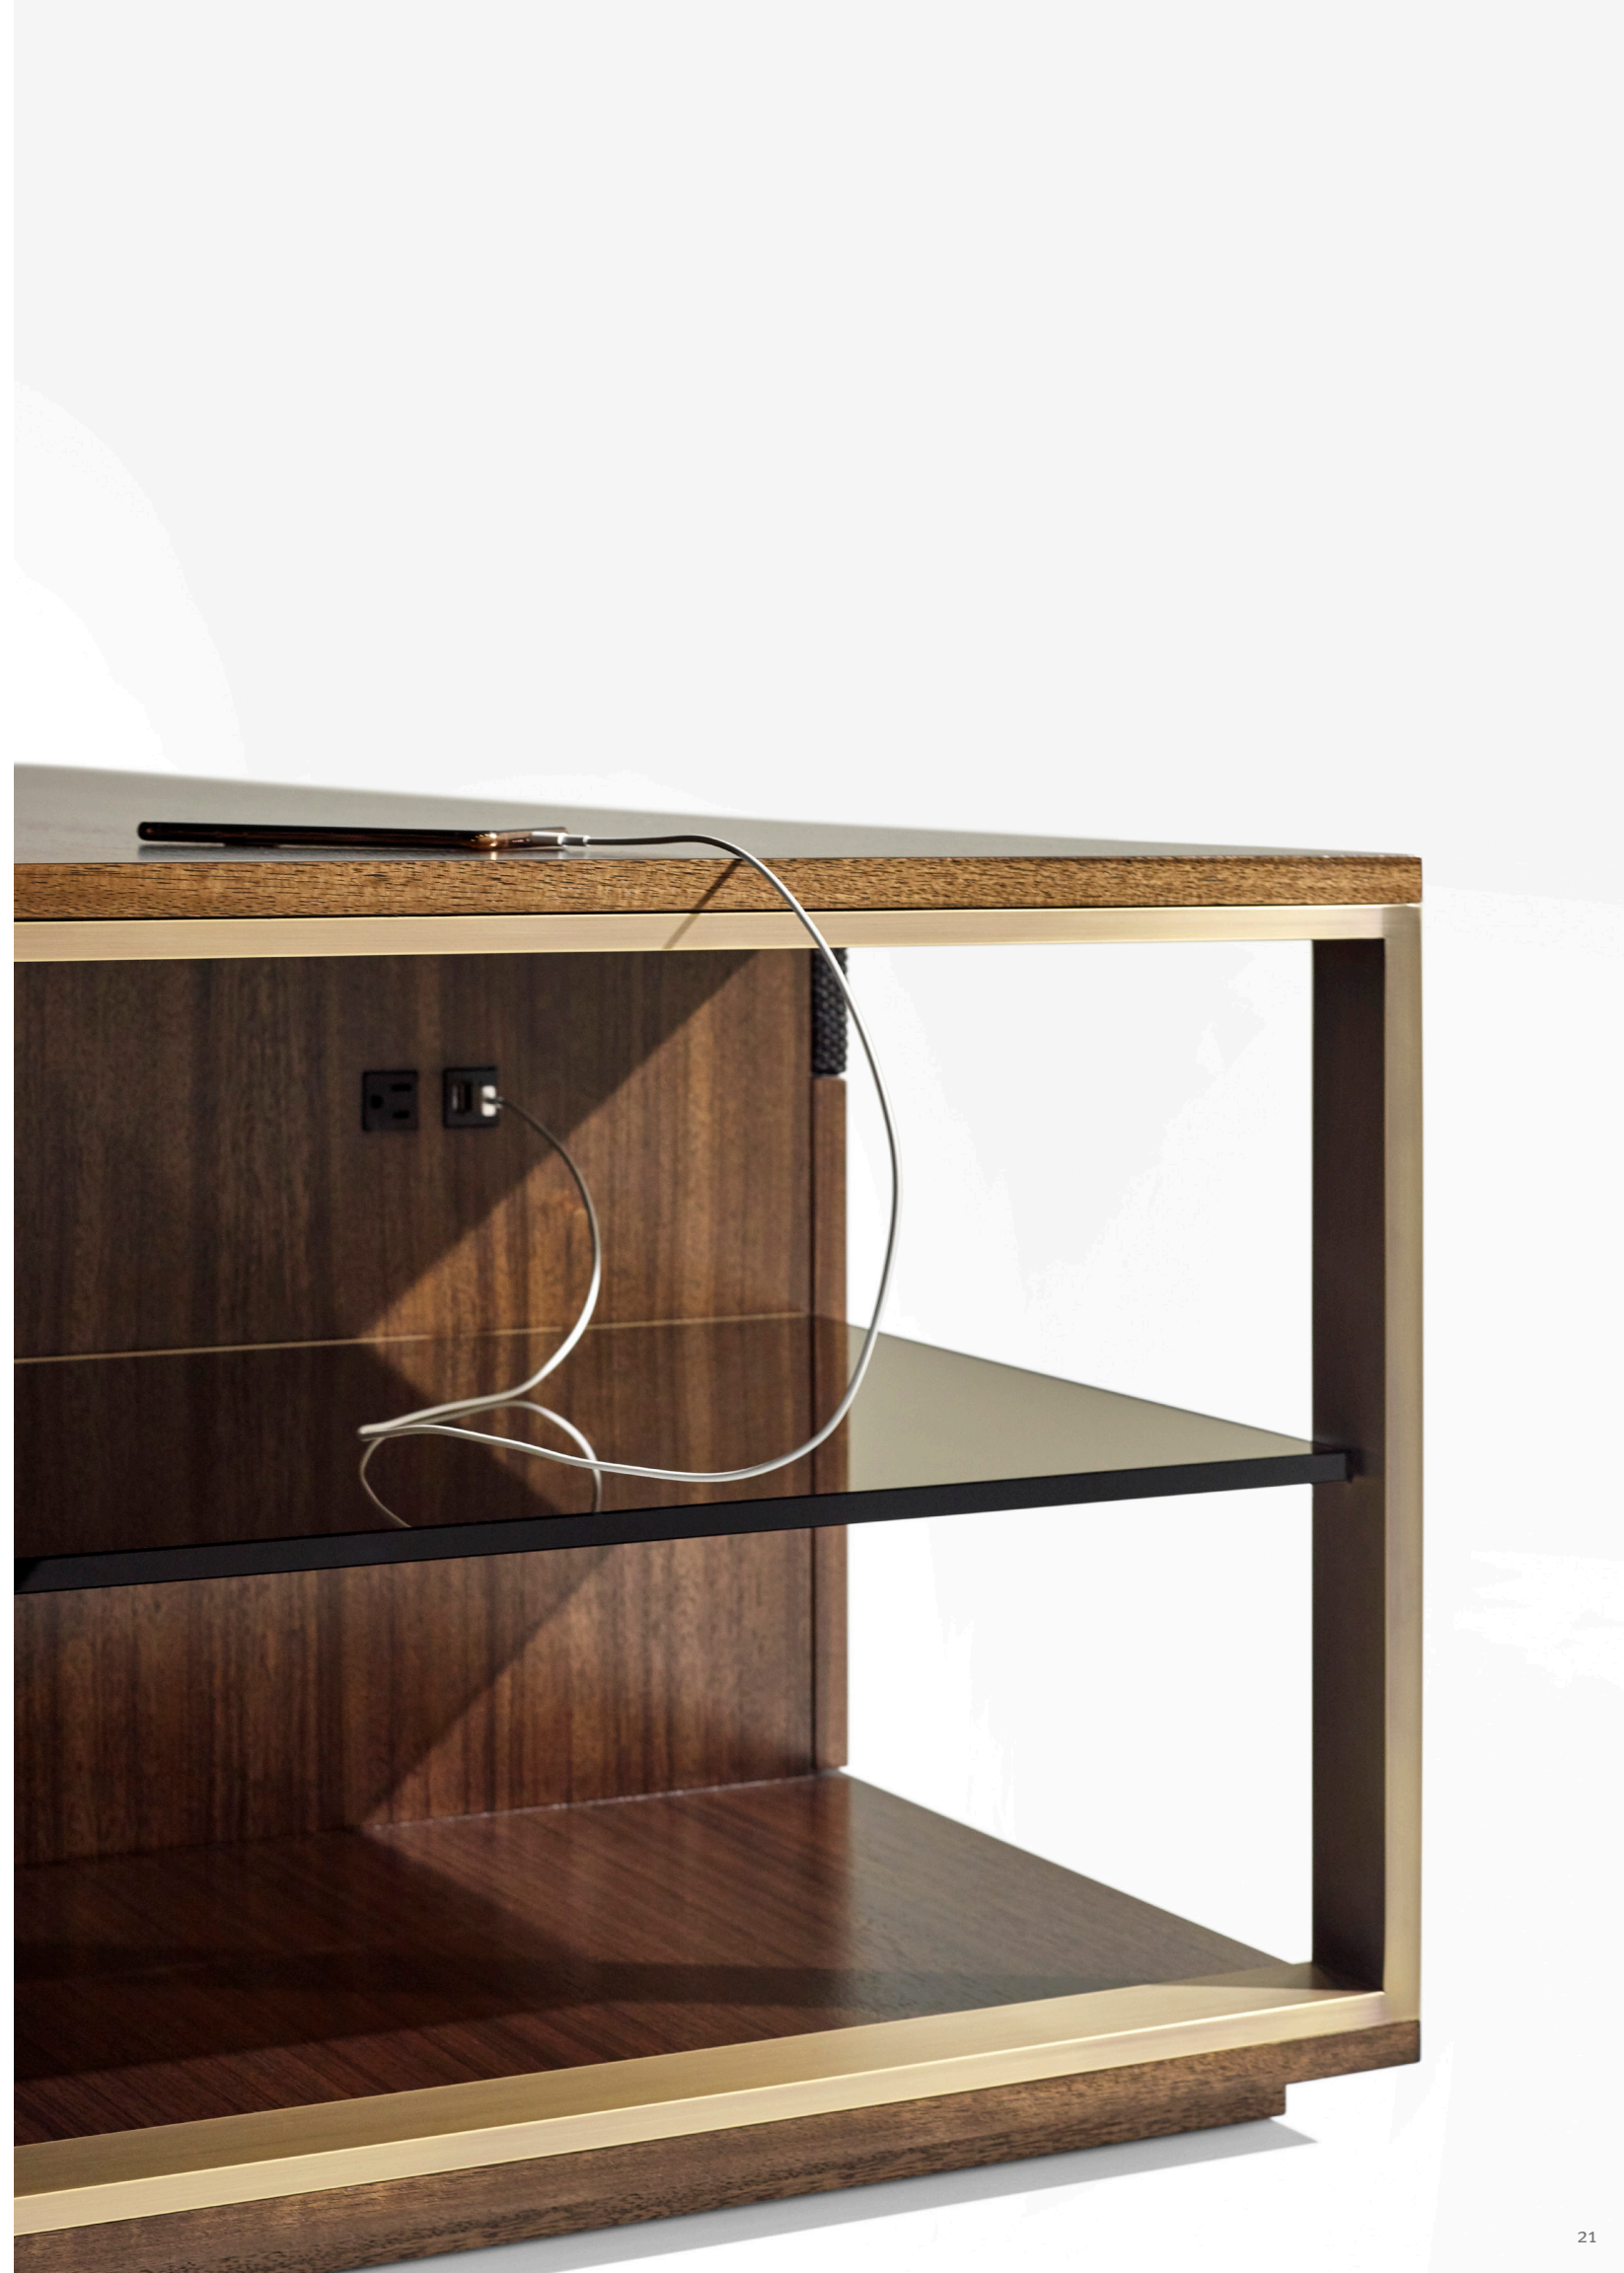

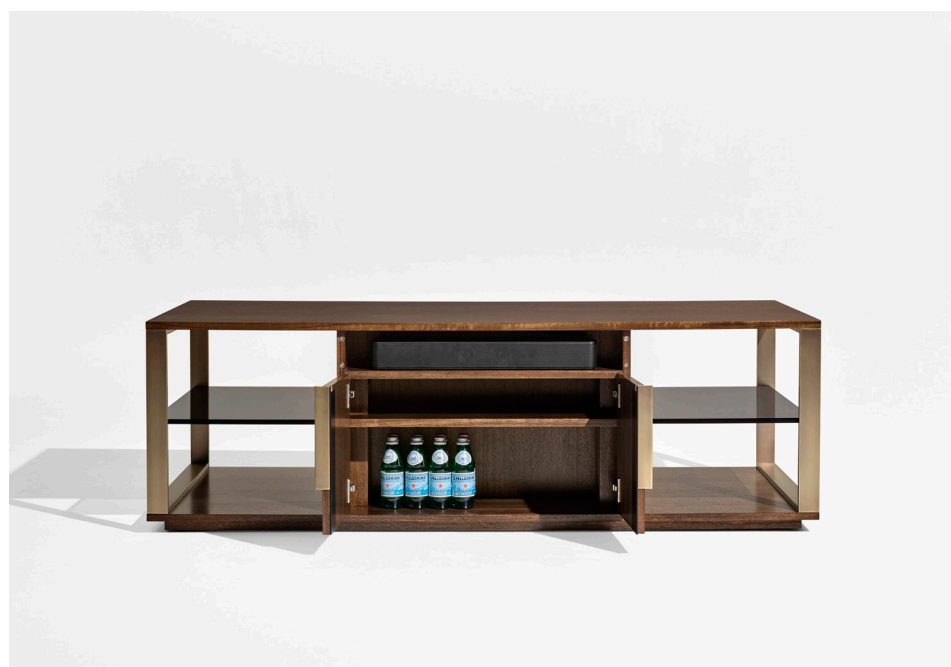

FORENA

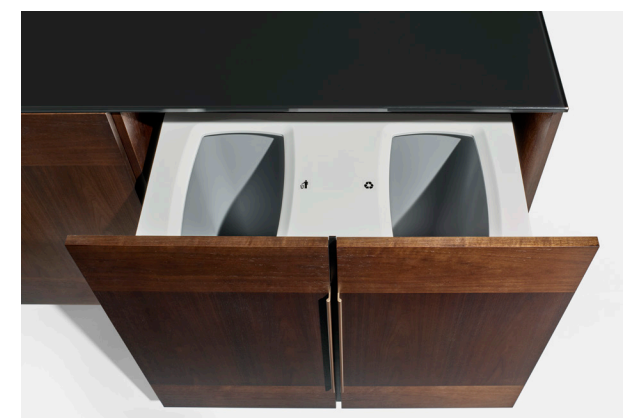

FORENA

In multi-use meeting spaces where work and entertainment go hand-in-hand, consoles are required to offer more than simple storage. With the Forena suite of credenzas, storage is only the beginning. Designed through a “resimmercial” lens, Forena is offered in three styles — Credenzas, Media Console, and Media Island — each nuanced for various workspaces with features such as built-in soundbar space, refrigeration drawers, waste and recycling compartments, and equipment racking, all enclosed within an elegant case.
