

Cadence conveys a transitional, or even traditional feel, yet its contemporary elements bridge the gap into the modern office. The standards that stem from 125 years of producing the finest in office seating are evident here: leathers and fabrics hand-cut and sewn, double-needle stitching and welting throughout, and the pride taken by our highly-skilled upholsterers as each chair is carefully custom-made.

CAD1-HW22W

Cadence is defined as "the measure of movement". This chair not only provides movement, but movement with unprecedented comfort - through a full range of motion and adjustment. The synchro-tilt mechanism moves the perfectly contoured back and seat in a 2:1 ratio, allowing the angle of the back to be changed with relatively little effect on the position of the user's legs and feet. Perhaps never before has ergonomics been combined with comfort so successfully.

CAD1-MW21B

With Cadence we set out to create a new standard in office seating design. This chair is the successful combination of three criteria: highly refined transitional styling and detail, comfort unequalled in its class, and a range of options that allow it to be enjoyed throughout the workplace.

What is most striking about Cadence is the way this chair sits. Cadence utilizes proprietary mold technology designed with three-dimensional imagery to create the ideal set of compound curves. The result is a chair that is exceptionally pleasurable to sit in, both initially and for extended periods of time. Cadence is one of the first chairs ever to attain this combination of aesthetics and ergonomically-correct comfort.

Completely Upholstered Polyurethane Adjustable

Wood and Polyurethane Wood and Upholstered

Two width sizes and two back heights offer great versatility: from larger to smaller user, from private office to meeting room workstation. As the workplace requires increasingly more flexibility, a chair that can be used in many ways is a good investment. Cadence guest is a comfortable companion to the series. Cherry and Maple hardwoods in the arms and base, as well as upholstered arms, are an elegant enhancement to Cadence. Black urethane arms (with the option of height and width adjustability) and a black nylon base provide attractive functionality and durability. Krug offers an attractive selection of in-stock fabric and leathers, and Cadence can also be upholstered in any other selected textile.
