

**HIGH DURABILITY MECHANISM**

This product features a heavy-duty mechanism, made with heavy-gauge steel and minimal moving parts - it's designed to last, and is backed by a 5-year warranty on the mechanism itself, in addition to the lifetime warranty on the rest of the product. If it does become damaged or degraded, the mechanism can be field-replaced.

**EASY OPEN AND CLOSE**

The sleeper is extended easily to either position, using a pull handle that is neatly tucked away when not in use. The sleeper can be quickly closed by raising the back, and then lowering the ottoman cushion into the storage position. Instructions for operating the sleeper are located on the front of the ottoman cushion.

**CUSTOM SIZING**

Patient rooms can often have specific dimensional limitations, and so we have created the capability for custom sizing, which can typically be quoted within a width range of 24"-58". Other customization is possible also - just tell us what you need!

**COMFORTABLE SLEEP SURFACE**

A new, enhanced sleep surface is 87" in length, providing exceptional range to stretch out in comfort, with supportive cushioning that is specifically designed for sleeping.

**WALL SAVER**

The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

**CHAISE/OTTOMAN POSITION**

In addition to the sitting and sleep positions, this position allows the user to sit (or even sleep) in comfort with legs elevated and supported.

**CASTERS**

Enhanced accessibility of the casters allows the caregiver or visitor to easily lock and unlock them. The 3" casters are soft wheel and non-marring, with a premium lock function, which locks both the wheel rotation and the swivel rotation to rigidly hold the unit in position.

**CLEANING & INFECTION CONTROL**

Specifically designed to ease the cleaning and disinfection of the sleeper and the floor underneath them - in the first opening stage, open access is provided to the floor underneath so it can be cleaned without having to move the sleeper. Upholstery covers can be made removable, and individual components are automatically removable, to enable thorough cleaning and disinfection.

**REMOVABLE & REPLACEABLE UPHOLSTERY & COMPONENTS**

Seat, back and ottoman upholstery covers can be specified as removable, so they can be removed for cleaning, or replacement. The mechanism, casters, front kickplate, arm panels and caps - as well as seat, back and ottoman cushions - are field-replaceable if damaged or degraded - so the life of this product can be extended indefinitely, and made to look good as new.
